DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/28/2008 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Morrison et al. (U.S. Patent 5,910,141).

Morrison et al. disclose a tool comprising a body (ref. #14, 18) having a proximal end portion and a distal end portion, said distal end including a first and second flexible branch (ref. #36/38) for gripping a spinal implant; an inserter shaft (FIG. 11b, ref. #88 and ref. #39) slidably received within said body, said inserter shaft having a distal end (ref. #88) adapted to hold a closure mechanism for said implant; a threaded collar (ref.

Art Unit: 3733

#16), adapted to couple said body and said inserter shaft, wherein said inserter shaft forces a spinal rod into the rod-receiving portion of said implant, and a cylindrical outer sleeve (ref. #12) rotatably and slidably mounted onto said distal end of said body, said outer sleeve movable between a first and second position, said body including a pin (ref. #24) projecting from said body and said outer sleeve has a channel for receiving said pin. The body further comprises external threads (ref. #28) to engage with the threaded collar.

Allowable Subject Matter

Claims 4, 7, 9, 11 and 15-20 are allowed.

Response to Arguments

Applicant argues that lever arm 12 of Morrison is not cylindrical. The examiner maintains that lever arm 12 is related to or having the shape or properties of a cylinder, and therefore, cylindrical.

The rejections are deemed proper.
